

Transparent Elegance

An air of elegance surrounds the D-G1MD mini Hi-Fi system and quietly pervades the room. A new concept in personal Hi-Fi design has come into the world, bringing delight to music lovers everywhere. Even though the D-G1MD contains all the functions of the receiver, the CD player, the MiniDisc recorder, and the cassette deck within a single unit, it is only 180 mm wide, 259 mm high, and 287 mm deep. You can set up the D-G1MD just about anywhere you like. There is a remarkable sense of transparency about the D-G1MD that lets it blend in well with virtually any interior, and it is small enough to fit onto a bookshelf, bay windowsill, or other inconspicuous spot.

Another remarkable aspect of the D-G1MD is the rich sound that fills your room from such a modest-looking unit. Then there is the D-G1MD's remarkable ease of use. The D-G1MD just gives you the functions you really need. With beautiful sound, elegant design, and simple operation, the D-G1MD is the perfect companion for a lifestyle that persistently beckons you to enjoy a few moments of peace.

■ DENON's Famous High-Quality Sound

Despite the D-G1MD's unassuming appearance, it boasts high output power of 20 W + 20 W, capable of reproducing all genres of music with a rich sound that effortlessly fills your listening space.

■ 4-mode Graphic Equalizer for Custom Sound Refinement

You can choose any of four sound spaces—Rock, Pops, Classical, and Flat—to enjoy the type of music you want to hear.

■ Versatile Timers

The D-G1MD provides a REC timer that activates the recording function when the power switch is turned on, and a Sleep timer that turns the unit off every night (or any other time) in 10-minute increments from 10 to 60 minutes after you turn it on.

■ Bass Control, for a Powerful Bass Foundation

The D-G1MD includes a Bass Control function that enriches the deep bass sound, further defying the modest size of the speakers. You can enjoy this reinforced bass foundation even at relatively low volume levels.

■ 5-mode Synchronized Recording (D-G1MD)

One-touch synchronized recording is possible in five modes: CD to MD, CD to cassette tape, MD to cassette tape and cassette tape to MD. (CD to MD and CD to cassette tape mode is possible for recording simultaneously.)

■ Large, Easy-to-Read Display

The characters on the D-G1MD's large display are clear and easy to read. The function buttons on the front panel, too, are large and glow in the dark for quick, easy operation at any time.

■ Auto Power Off

In a function mode other than the tuner, if there has been no operation for approximately 30 minutes, the system will automatically turn itself off to reduce power consumption.

■ Convenient CD Editing Functions

Playback functions include Random Play, 20-track Programmed Play.

■ MD Pick Rec, an Innovative Recording Function (D-G1MD)

While you are listening to a tuner and want to record the track you are hearing, you can use MD Pick Rec, that records the track from the beginning.

■ A Wealth of Easy-to-use MD Editing Function (D-G1MD)

Full Logic Auto Reverse Mechanism, for Automatic Playback of the Reverse Side of a Tape

■ Dolby Noise Reduction, for Improved Sound Quality during Recording and Playback

The D-G1MD is equipped with a Dolby B noise reduction circuit to reduce tape noise and enhance the realism of the sound over the full spectrum from large to small signals.

Speaker Section

■ Pearl Mica Woofer Cones, for Superior Response Characteristics

The D-G1MD's speakers feature soft dome tweeters and woofers with pearl mica cones that are highly responsive to sound vibrations. The combination of the two produces a clear, lively sound, rich with musical details.
